Correction: .....

(C) Reading Comprehension

4) Read the following passage, then answer the questions. (4 marks)

A science class noticed that the school garden was being watered even after rain. The students built a simple sensor to measure soil moisture. A screen showed the results, and the watering system started only when the soil was dry. Groups compared the readings during their lessons and discussed why they changed. Within a month, the school used less water without harming the plants. The project also gave shy students a reason to explain their findings to classmates. It showed how a digital tool could support both practical learning and responsible use of resources.

1- When did the new watering system start?

.....

2- What environmental benefit did the project bring?

.....

3- The screen helped students _____.

A) compare and discuss real measurements
B) avoid all group work
C) water plants after every shower
D) stop studying science

4- Why was the project useful for shy students?

A) They could leave every lesson.
B) They no longer needed classmates.
C) It encouraged them to explain their findings.
D) It removed the need to speak.
