Grandma's Story

Finn's Birthday

Once upon a time, there was a secret guest on a birthday party. It was Finn. Finn was a nice little ant. She saw a box of sweets and a big chocolate cake. First, Finn wanted to carry the sweets home but they were so heavy. After that, she decided to invite some friends to help her. Finn came back with a group of giant friends of her. When Dix, one big ant, saw the ice cream bowl, he jumped into it. Dix was nearly drowned. Luckily, Finn and the other friends used a small stick to save Dix from the bowl. The stick became very heavy with the ice cream. Finally, Finn and the giant ants decided to carry the stick home instead of the sweets and licked Dix all the way home instead of the chocolate cake.

3 Read and Choose the Correct Answer

Do you ever wonder how long the year is on different planets? Well, the year is the time it takes for a planet to go all the way around the Sun one time. On Earth, the year is about 365 days. But on other planets, it can be much shorter or much longer!

Let's start with Mercury, the closest planet to the Sun. The year on Mercury only takes 88 Earth days. That's really fast! Venus, the second planet from the Sun, takes 225 Earth days to go around the Sun one time. Earth, our home planet, takes 365 days to complete one orbit around the Sun. Mars, the fourth planet from the Sun, takes 687 Earth days for the year. That's almost two Earth years!

Now let's talk about the giant planets. Jupiter, the biggest planet, takes a really long time to go around the Sun. a year on Jupiter is about 4,333 Earth days. That's more than 11 Earth years! Saturn, the planet with the beautiful rings, takes 10,759 Earth days for a year. That's almost 30 Earth years! Uranus, the seventh planet from the Sun, takes 30,687 Earth days for a year. That's about 84 Earth years! And Neptune, the farthest planet from the Sun, takes a whopping 60,190 Earth days for a year. That's almost 165 Earth years!

1 How long does it take for Mercury to go around the Sun one time?

A) 88 Earth days

B) 365 Earth days

C) 687 Earth days

D) 4,333 Earth days

2 Which planet takes the longest time to go around the Sun?

A) Mercury

B) Earth

C) Jupiter

D) Neptune

3 What is the main idea of this passage?

- A) All planets have the same length of a year.
- B) The year on Earth is 365 days.
- C) Different planets have different lengths of a year.
- D) The Sun is the center of the solar system.

4 Which planet takes the shortest time to go around the Sun?

- | | |
|----------|-----------|
| A) Venus | B) Earth |

5 How many Earth years does it take for Uranus to go around the Sun?

- | | |
|-------------------|--------------------|
| A) 11 Earth years | B) 30 Earth years |
| C) 84 Earth years | D) 165 Earth years |

4 Correct the Mistakes

- 1 Mars is **bigger** than Jupiter. **smaller**
- 2 The Earth is hotter than Venus.
- 3 Uranus is closer to the sun than Mercury.
- 4 A year on Earth is longer than a year on Neptune.
- 5 The sun is a planet in the solar system.

The sun is very important to the Earth. It is the closest star to us. The sun gives us light and heat, which is called solar energy. This energy helps plants grow and gives us food and oxygen. Without the sun, the Earth would be very cold and there would be no wind or clouds. People have been using solar energy for thousands of years.

Solar energy is very important for farming. It helps us grow crops and raise animals. Solar energy also helped early civilizations build their homes. They faced their buildings towards the sun to get heat and light. They used windows and skylights to let the sun and air in. Today, we have computer programs to help us use solar energy better.

The sun is also important for cooking. People have been using solar energy to cook food for a long time. Now, there are many different types of solar cookers that we can use. Solar energy is a very important source of energy for us. We need the sun to live on Earth.

1 How does the sun help us?

A) **The sun gives us light and heat, which is called solar energy.**

B) The sun is the closest star to us.

C) The sun has been around for a very long time.

D) The sun helps us grow crops and raise animals.

2 Why is the sun important for living on Earth?
